

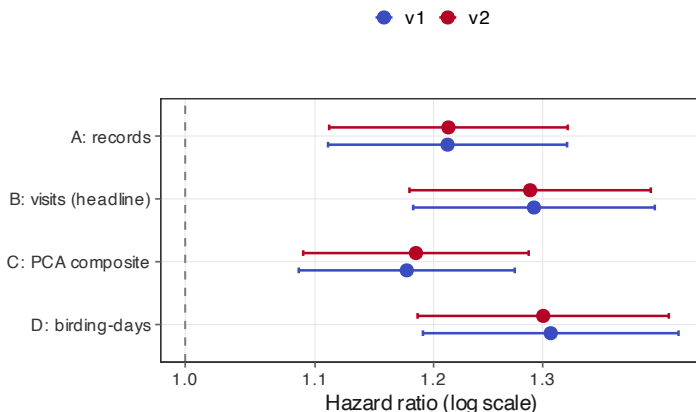

Figure 2 — Province-scale climate × effort interaction is robust to model spec, effort metric, and v1↔v2 refit

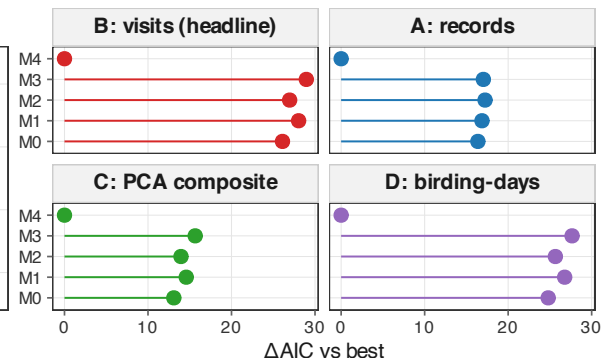

a

Climate × effort interaction (M4), v1 ↔ v2

b

Model-selection ladder (ΔAIC)

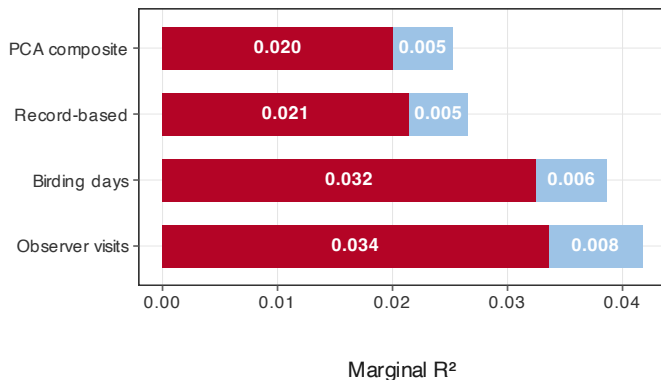

c

Marginal- R^2 decomposition

Interaction-only dominates (78-84 % of M4 marginal R^2)

■ Additive (M3) ■ Interaction-only (M4 – M3)

d

Interaction HR across 4 effort specifications
